

Let $A = 1, 2, 3, 4$. Write out the ordered pairs for each of the following relations :

- $<$ (less than) [For example $(2, 3)$ is one of the ordered pairs since $2 < 3$]
- $|$ (divides) [For example $(1, 2)$ is one of the ordered pairs since $1|2$]

$$A = \{1, 2, 3, 4\}$$

$$R : \{\{1, 2\}, \{1, 3\}, \{1, 4\}, \{2, 3\}, \{2, 4\}, \{3, 4\}\}$$

$$S : \{\{1, 1\}, \{1, 2\}, \{1, 3\}, \{1, 4\}, \{2, 2\}, \{2, 4\}, \{3, 3\}, \{4, 4\}\}$$
